Monochrome Definition: An image is considered to be Monochrome only if it gives the impression of having no colour (i.e. contains only shades of grey which can include pure black and pure white) OR it gives the impression of being a greyscale image that has been toned in one colour across the entire image. (For example by Sepia, red, gold, etc.)

Nature Photography definition: Nature Photography is restricted to the use of the photographic process to depict all branches of natural history, except anthropology* and archaeology*, in such a fashion that a well-informed person will be able to identify the subject material and certify its honest presentation. (Suggested*: An example will be helpful to the New Jury).

The story telling value of a photograph must be weighed more than the pictorial quality while maintaining high technical quality.

8. Welfare of the subject is extremely important. Use of live bait is totally prohibited. Relocated nest is a big NO NO and jury members should not award Nest images.

Images entered in Nature section meeting the Nature Photography Definition above can have landscapes, geologic formations, weather phenomena, and extant organisms as the primary subject matter.
